

Anti-Fog Face Mask Kit

Pack of 4 Anti-Fog Accessories

The Anti-Fog Face Mask Kit contains two types of nose clip, a lanyard and an ear saver. Both nose clips secure the face mask snugly around your nose, helping to prevent glasses from fogging/steaming up.

The Anti-Fog Nose Clip is for use with a face mask that incorporates a wire support/hem on the top. It is very robust, easy to secure and comfortable to wear.

The Lanyard Nose Clip is typically for face masks without a wire support/hem on the top, although can also be used with those that do have them. When not in use, the Lanyard Nose Clip can be freely worn around the neck, making it ideal for medical staff who use multiple disposable masks a day.

The Ear Saver acts as an extension to the face mask straps, meaning the mask is supported around the back of the head, rather than digging into the back of the ears.
